

DOB WELDING REQUIREMENT

The Department of Buildings (DOB) is requiring that welders submit a copy of their “original” welding certification from an approved agency. Submission of the annual testing coupon is not acceptable for DOB’s verification of original documentation. The original testing laboratory must be an approved DOB testing facility. Below is a list of the testing agencies currently approved by DOB. It is subject to revision.

Certified Agencies To License Welders 8/11/08
